PROFESSIONAL SUMMARY

Backend and Integration Developer with more than three years of experience in software development, REST APIs, ETL processes, databases and enterprise system integration. Currently an APX (Java) Developer at Novatec for BBVA. Over two years building and migrating integrations with MuleSoft 4, DataWeave, RAML, Anypoint Platform, CloudHub and Oracle, including Salesforce integration migration.

PROFESSIONAL EXPERIENCE

APX Developer (Java) | Novatec

Oct 2026 – Present

BBVA project · Bogotá · Hybrid

- Java backend development on APX, BBVA's architecture for online and batch transactions.
- Building transactions, DTOs and libraries under the bank's development, quality and security standards.
- Applying secure development practices aligned with OWASP to banking services.

MuleSoft Integration Developer | Globant

Aug 2026 – Oct 2026

Telecommunications client · Remote · Contractor

- Migrated Mule 4 integrations for Leads, Contacts and Opportunities during a Salesforce org separation.
- Designed RAML specifications with APIkit, published to Anypoint Exchange, and DataWeave transformations.
- Delivered knowledge transfer of the integration flows to other developers on the team.

MuleSoft & Integration Developer | PhiDimensions

Jul 2024 – Aug 2026

Remote

- Developed, maintained and migrated REST APIs and ETL processes with MuleSoft 4, integrating applications and Oracle databases using DataWeave, RAML, JSON and XML.
- Migrated existing services to MuleSoft with validations, data transformation and centralized error handling.
- Deployed, configured and supported applications on CloudHub and Runtime Manager.
- Implemented traceability with logs and correlation IDs; technical documentation, Git and agile delivery.

TECHNICAL SKILLS

Languages & backend: Java 21, APX, Spring Boot, Spring Web, Spring Data JPA, Spring Security, JWT, Maven, REST APIs

Integration: MuleSoft, Mule 4, Anypoint Platform, Anypoint Studio, Anypoint Exchange, CloudHub, Runtime Manager, APIkit, RAML, DataWeave, ETL, JSON, XML, Salesforce

Databases: Oracle, PostgreSQL, SQL Server, SQL, PL/SQL, Flyway

Quality & tools: JUnit, MUnit, Postman, OpenAPI/Swagger, Git, GitHub, Docker, DBeaver, OWASP, Scrum

PROJECTS

Cham Orders API (Java, Spring Boot): REST API for customers, products and orders with Java 21, Spring Boot, Spring Security (JWT, roles), PostgreSQL, Flyway, Docker and OpenAPI. Centralized error handling and 38 automated tests.

Cham Orders Mule Integration (MuleSoft): Order synchronization with APIkit, RAML, JWT, pagination, X-Correlation-ID and DataWeave mapping into a canonical model. 12 MUnit tests.

EDUCATION

B.S. Systems Engineering (in progress, ninth semester) | Fundación Universitaria San Mateo

CERTIFICATIONS

- OCI 2025 Certified AI Foundations Associate – Oracle (Mar 2026)
- Scrum Fundamentals Certified (SFC) – SCRUMstudy (Nov 2023)
- Professional Docker Course – Código Facilito (Nov 2024)
- Oracle Next Education, 286 hours – Oracle and Alura Latam (Jul 2024)
- AWS Cloud Essentials (AWS Foundations) – AWS (Sep 2023)
