BACKEND & INTEGRATION DEVELOPER | JAVA | SPRING BOOT | MULESOFT

Backend and Integration Developer with more than three years of experience in software development, REST APIs, ETL processes, databases, and enterprise system integration. Professional experience with MuleSoft 4, DataWeave, Oracle, CloudHub, Git, and Postman, complemented by verifiable backend projects developed with Java 21, Spring Boot, PostgreSQL, Docker, and OpenAPI.

TECHNICAL SKILLS

Backend: Java 21, Spring Boot, Spring Web, Spring Data JPA, Spring Security, JWT, Maven, and REST APIs.
Integration: MuleSoft, Mule Runtime 4, Anypoint Platform, APIkit, RAML, DataWeave, ETL, JSON, and XML.
Databases: PostgreSQL, Oracle, SQL Server, SQL, and Flyway.
Tools and testing: Git, GitHub, Docker, Postman, OpenAPI/Swagger, JUnit, MUnit, and DBeaver.

PROFESSIONAL EXPERIENCE

PHIDIMENSIONS — MuleSoft & Integration Developer

Jul 2024 – Present

- Development, maintenance, and migration of REST APIs and ETL processes using MuleSoft.
- Implementation of integrations between services, applications, and Oracle databases.
- Data transformation and validation using DataWeave, JSON, and XML.
- Implementation of error handling, execution traceability, correlation IDs, technical documentation, and source control with Git.

UNINPAHU — Software Developer

Oct 2022 – Dec 2023

- Development and maintenance of academic and administrative applications.
 - Optimization of queries and processes using Oracle and SQL Server databases.
 - Automation of internal processes, incident resolution, and technical documentation.
-

FEATURED PROJECTS

CHAM ORDERS API — Java Backend

REST API for managing customers, products, and orders, developed with Java 21 and Spring Boot.

- JWT authentication and role-based authorization for ADMIN and OPERATOR users.
- PostgreSQL, Spring Data JPA, Flyway, Docker, and OpenAPI/Swagger.
- Business rules, validations, centralized error handling, and historical snapshots.
- 38 automated tests and comprehensive validation in a Docker environment with PostgreSQL.

CHAM ORDERS MULE INTEGRATION — MuleSoft

MuleSoft integration designed to synchronize confirmed orders from Cham Orders API.

- APIkit, RAML, JWT authentication, pagination, and X-Correlation-ID propagation.
 - DataWeave transformation into a canonical model and JSON file generation.
 - 12 successful MUnit tests and local validation of success and error scenarios.
-

EDUCATION

Fundación Universitaria San Mateo

Systems Engineering — Ninth semester

CERTIFICATIONS AND LANGUAGES

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle | Mar 2026 – Mar 2028

Oracle Next Education — Oracle | Jul 2024 | 286 hours

Professional Docker Course — Código Facilito | Nov 2024

AWS Foundations: Getting Started with the AWS Cloud Essentials | Sep 2023

Spanish: Native | English: Intermediate
